

Fumonisin B1-Antibody

Monoclonal Antibody against Fumonisin B1 (FUM)

Specification

Antigen	Fumonisin B1 (FUM)
Cross-Reactivity	not tested
Type of Antibody	Monoclonal
Host Animal	Mouse
Tested Application	ELISA, kFP
Antibody Concentration	1 mg/ml, after reconstitution with deionized water
Volume	-
Amount of Antibody	m ≈ 1.0 mg
Buffer	lyophilized, Lot specific information
Quality Controller	Lot specific information
Storage	4 °C, protect from light
Retest date	Lot specific information

Note

Contains Lot specific salts. Reconstitute in deionized water for a concentration of 1 mg/mL.

Caution

The use of this product is strictly limited to trained personnel for professional manufacturing, laboratory, or research purposes. Substance not yet fully tested. Final Fitness-For-Use must be determined by and is the sole responsibility of the end-user.
